When doing an astrocartography reading, there are four major components to be considered.

***First:** Maps are generated with your specific ‘lines’ that indicate where energies of the planets were strongest when you were born. You will receive a global map and maps of suggested locations.*

***Second:** Charts are cast for specific locations “as if” you were born there. You will receive copies of these that any astrologer could read for you.*

***Third:** Me! With over 30 years of astrological study, giving readings and intense curiosity, I bring you my best interpretation of ideal locations. You are welcome to make your own recording if that is helpful for you.*

***Fourth:** YOU! This is the most important ingredient in the mix. That is why the more completely you fill out the questions, the better I will be able to serve you.*

When I had my first astrocartography reading, the astrologer told me the best location for me on this earth was Anchorage, Alaska! He never asked if I was bothered by extreme cold or long winters. So north to Alaska was not an option for me. However, it did spark the idea to ask these important questions before beginning the evaluation process.

Thank you for taking the time to thoughtfully fill out the questionnaire and returning it to me. If you think of other questions that would be suitable, please let me know!

*All the best to you as you take the next steps on your journey,
It is an honor to walk beside you for awhile.*
